Fifth:

- There are numbers of unidentified bodies
- Most of the villages still under siege and some of the people are hiding in the mountains without water and food that include children and elderly people, all the road are inaccessible as the RSF is controlling the road between El Rahad

and Al Daair Mountains, and the attacks took place from four direction leaving no rooms for people to scape.

- They confiscate their belongings and forcing villagers to carry some of items even children were forced to carry heavy things for over 10 Kilometres
- The militias have destroyed all the water pumps.
- With the rainy seasons approaching its impossible for villagers to survive without help.

Sixth

We strongly condemn the barbaric act of RSF and its allied militias for targeting unarmed civilian mainly for their ethnic and tribal background, the perpetrators of these crimes must be held to account, as its clear these acts represent war crimes and crimes against humanity.

Recently RSF and the tribal militias continue to target local markets and villages around the boarders between North Kordofan and South Kordofan they attack Gardod Najma markets two times since March 2024, and numbers of villages part to Al Abbasiya Talgli localities also targeted and that forces over ten thousand people to flee to the town of Al Abassiya Tagali without any support from local authorities or humanitarian organisations.
